Introduction to Blockchain

Blockchain technology is the foundation upon which ZIONEX (ZON) Token operates. It ensures that all transactions within the ecosystem are secure, transparent, and decentralized. In this section, we will explore what blockchain is and how it powers the ZON Token to create a trusted digital economy.

➤ What is Blockchain?

Blockchain is a decentralized digital ledger that records transactions across a network of computers. Each transaction is stored in a "block," and once verified, it is added to a "chain" of previous transactions. What makes blockchain unique is that these records are immutable, meaning they cannot be altered or deleted, ensuring full transparency and security.

Unlike traditional systems that rely on a central authority, blockchain operates in a decentralized manner. This allows participants to trust the system without needing a middleman, as every transaction is validated by multiple participants in the network. Blockchain's decentralized nature also increases security, making it resistant to hacking and fraud.

➤ How Blockchain Powers ZIONEX

Centralized and Decentralized Systems

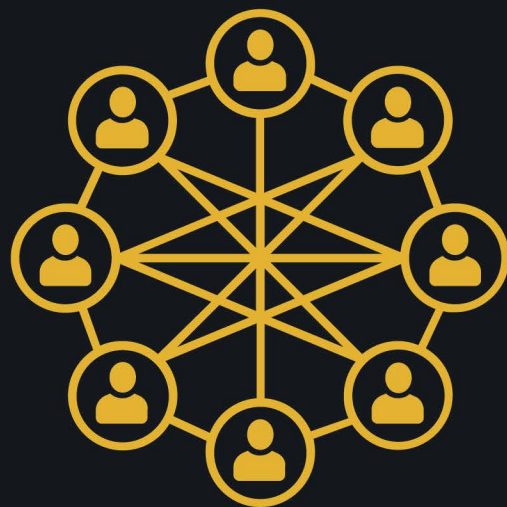

Centralization and Decentralization are two modes of working in any organization. In centralization, there is a hierarchy of formal authority for making all the important decision for the organization. And in decentralization decision making is left for the lower level of organization.

Centralized networks are more vulnerable to cyber-attacks and data breaches because all the data is stored in one central location. This makes it easier for hackers to target and steal sensitive information. On the other hand, decentralized networks use multiple nodes to store data.

Future of WEB3 Tech

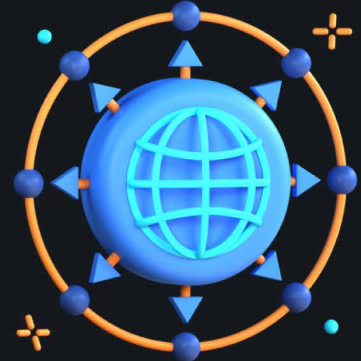

Revolutionizing Communication with Web 3.0

Web 3.0, a recent Internet technology, combines AI, machine learning, and blockchain for real-time human communication. It cuts out intermediaries, streamlining business operations and enhancing collaboration.

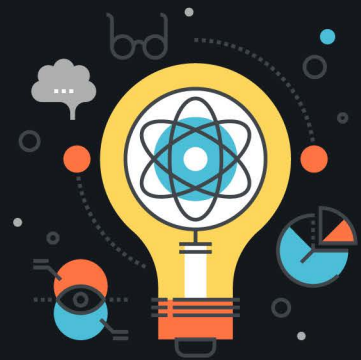

Empowering Individuals Through Decentralization

Web3 tech empowers individuals by giving them control over data and assets, fostering participation in decentralized networks, leading to economic and social empowerment.

Decentralized Work Models and Developer Innovation

It promotes decentralized work models, enabling effective remote team collaboration without sacrificing transparency. The shift to blockchain tech empowers Web3 developers to create versatile, decentralized solutions.

Cryptocurrency and ICO

Cryptocurrency is a decentralized digital currency based on blockchain technology and cryptography. It operates as a medium of exchange on a network without central authority, like a government or bank. It eliminates the need for intermediaries like banks during transactions.

Bitcoin, created by pseudonymous developer Satoshi Nakamoto in January 2009, was the first cryptocurrency. It used SHA-256, a cryptographic hash function, in its proof-of-work scheme. Cryptocurrencies typically have decentralized control, unlike central bank digital currencies (CBDCs). They rely on distributed ledger technology, usually a blockchain, as a public transaction database.

As of June 2023, there were over 25,000 cryptocurrencies, with more than 40 having market capitalizations exceeding \$1 billion. Initial coin offerings (ICOs) are fundraising events in the cryptocurrency and blockchain space, akin to initial public offerings (IPOs) but using cryptocurrencies.

About ZON Token

Investing in the best Initial Coin Offering (ICO) can be an exciting way to support cutting-edge technology projects and potentially earn high profits. ICOs offer a unique opportunity to invest in innovative new projects at an early stage, which can provide an advantage in terms of pricing and access.

We are creating and distributing our token through this Zionex Global Web3 Enrichment programme.

Zionex (ZON)

ZON is a native token of Zionex Global. ZON is a core of this Web3 community enrichment programme. ZON is created in BEP20 token standard. BEP20 token is a cryptocurrency token which is developed from the Binance Smart Chain Blockchain that functions similarly to Ethereum's ERC20 standard. Therefore, it is named after its native blockchain platform as BEP20 token, which is now trending the global market.

A. Activation

Activation is the first step to enter in the Zionex global by purchasing 61 ZON for 60 USDT.

1. Direct Referral Income

Unlock a steady stream of income with Zionex! Our direct referral income programme is your gateway to financial growth. Simply invite friends, family, or colleagues to join Zionex, and watch your earnings soar. The more referrals you make, the more income you can earn. It's that easy. Join us today and start building a brighter financial future.

- Direct referral commission 10%
- 10% of 60 USDT = 6 USDT
- User can refer unlimited number of members
- **3 USDT will given directly to wallet as payout, remaining 3 will go to reactivation wallet for reactivation purpose.**

Direct Referrals	Income Generated	Reactivation	Direct Payout
2 Members	12 USDT	6 USDT	6 USDT
10 Members	60 USDT	30 USDT	30 USDT
100 Members	600 USDT	300 USDT	300 USDT

2. Community Generation Income

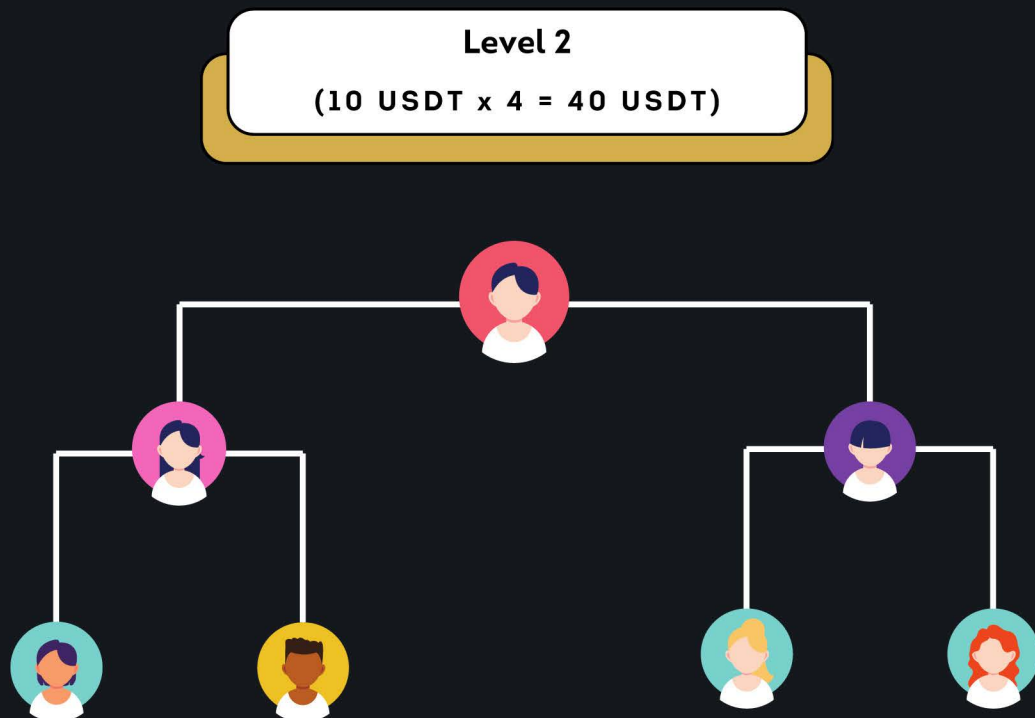

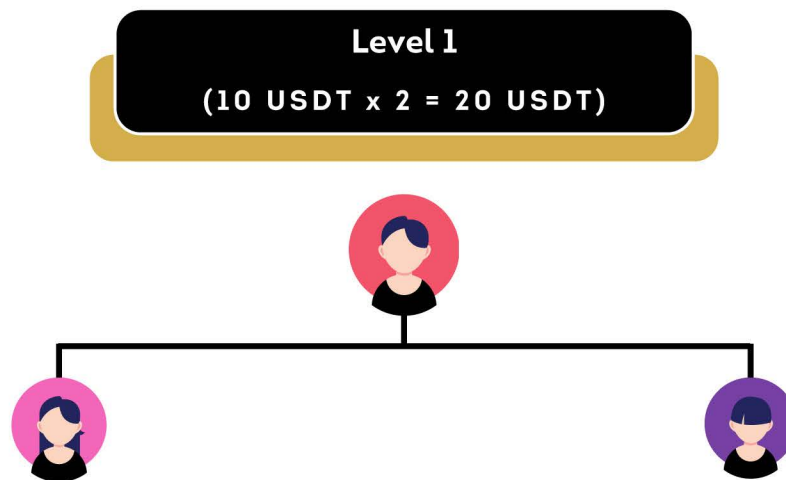

Participants will receive a Community Generation income of 10 USDT each time their downline activates or reactivates their identification up to 4 levels.

This income structure operates on a Community Generation system that utilizes a 2x2 binary auto spillover mechanism to distribute earnings.

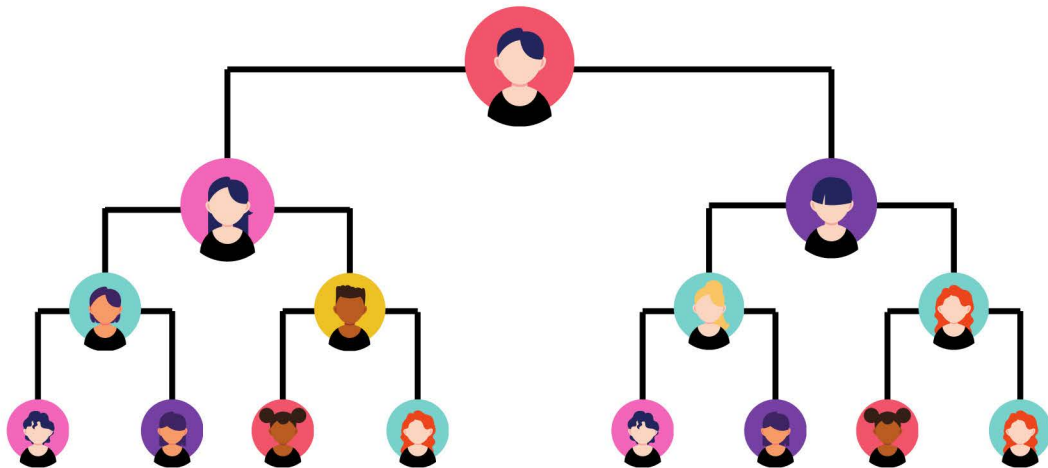

- **5 USDT will given directly to wallet as payout, remaining 5 USDT will go to reactivation wallet for reactivation purpose.**

- **Level 1 - 10 USDT x 2 Members = 20 USDT**
- **Level 2 - 10 USDT x 4 Members = 40 USDT**
- **Level 3 - 10 USDT x 8 Members = 80 USDT**
- **Level 4 - 10 USDT x 16 Members = 160 USDT**

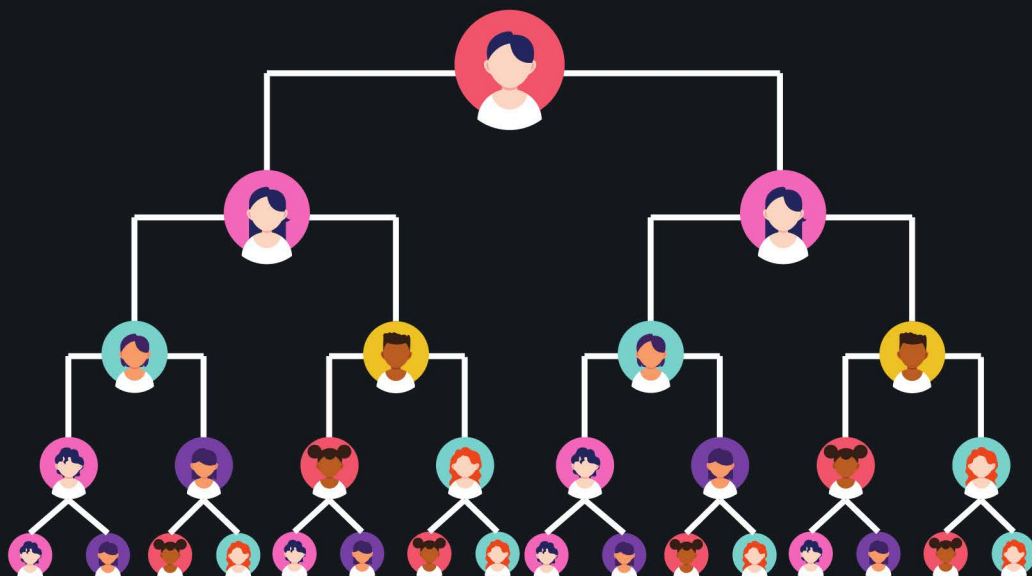

When a user's profits reach 120 USDT, comprising Direct Referral Income and Community Generation Income, their ID will be deactivated until reactivated with a fee of 60 USDT to resume earning profits.

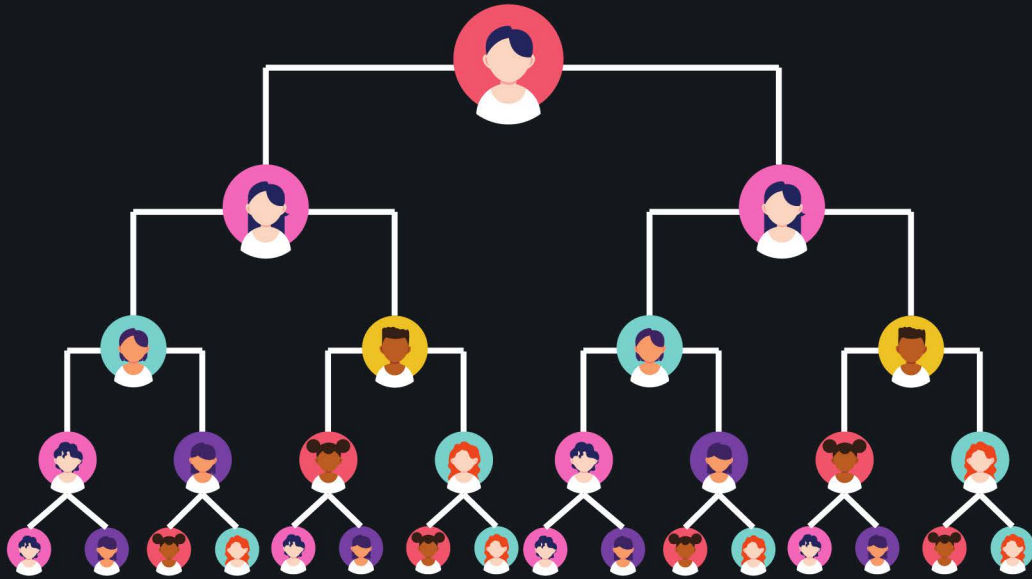

Level 3
(10 USDT x 8 = 80 USDT)

Level 4
(10 USDT x 16 = 160 USDT)

Income to parent from 4 levels
(10 USDT x 30 = 300 USDT)

Level	Members	Income Generated	Reactivation	Direct Payout
1	2 x 10 USDT	20 USDT	10 USDT	10 USDT
2	4 x 10 USDT	40 USDT	20 USDT	20 USDT
3	8 x 10 USDT	80 USDT	40 USDT	40 USDT
4	16 x 10 USDT	160 USDT	80 USDT	80 USDT

3. Token Staking Income

The tokens will undergo a one-year lock-in period during which the company will provide a monthly interest of 5% in token form.

For instance, on a holding of 60 tokens, this equates to a monthly increase of 3 tokens. At the end of the one-year period, users will receive an additional 36 tokens, resulting in a total of 96 ZON. After this one-year duration, users will have the option to sell their tokens on international exchanges.

The Direct Token Buying Commission stands at 10%.

For instance, when a user purchases 100 tokens with 100 USDT, the sponsoring user will also receive a commission of 10 tokens (equivalent to 10%) credited to their wallet.

Additionally, the minimum buying limit for tokens is set at 50 ZON.

4. Direct Token Buying Income

5. Reactivation Income

B. Reactivation

Zionex offers other than generation income is **Reactivation Income**. It is one of the foremost and splendid income generation plan of each user for life time. Each and every user can achieve unlimited income from reactivation process.

Once the total income of a user reaches 120 USDT of both direct referral income and community generation income, their ID will be deactivation automatically unless the user ID is reactivated with an amount of 60 USDT from reactivation wallet to resume earning profit.

Hence, once the user ID is deactivated, a new user placed with in 4th level as direct referral. Direct referral income 60 USDT and community generation income 10 USDT will be missed can be seen the missed income wallet in Zionex dashboard.

The user once reactivated the wallet by himself, it will resume all income from activation and reactivation process. Each and every user must pay attention to keep the ID always active.

At the time of reactivation their total income will be 120 USDT. Out of this 60 USDT will be their reactivation wallet and the remaining 60 USDT already withdrawn by wallet as their payout.

This cycle will continue unlimited number at times once the total income reaches 120 USDT.

At the time of community generation in a high manner, the reactivation process will be increased numbers of tens. So that you can earn 300 USDT to 5000 USDT per day.

Once every 60 USDT reactivation happens, on that time, the amount will be distributed up to 4 levels.

So every user get the opportunity to earn unlimited from just investing 60 USDT.

Upon reactivating their ID 5 times, the user will attain a daily income of 600 USDT. Additionally, for each instance where a downline member reactivates their ID with 60 USDT, a Community Generation Income of 10 USDT is credited to the referring user.

Reactivation Count	Per Day Payoff
1	60 USDT
2	120 USDT
3	180 USDT
